Andrew Thompson（Co-Founder, President and Chief Executive Officer of Proteus Digital Health）

Andrew Thompson is Co-Founder, President and Chief Executive Officer of Proteus Digital Health. His vision for digital medicines is focused on expanding global access to care, dramatically increasing the value delivered by drugs and creating a sustainable model for innovation that leverages the cell phone in everyone's pocket. He is also a Co-Founder of Summit Schools, a leading Charter High School organization with an acclaimed track record and unique digital platform, featured in the Davis Guggenheim movie Waiting for Superman. Thompson is active in digital humanities innovation with Stanford University and Cambridge University and a Co-Founder of Parker Library Online - a leading destination for digital medieval studies. He holds masters degrees in Engineering (Cambridge), Education (Stanford) and Business (Stanford GSB) and has a successful 25 year track record starting and building technology based healthcare companies in Silicon Valley.
